- Programming Languages: JS, Python, Java, C, C++.
- Backend: Springboot and Django.
- Frontend: React,Tailwind, Bootstrap, HTML5, CSS3.
- Multiplatform: Flutter + Firebase
- Data bases: MySQL, PostgreSQL.
- DevOps & Cloud: Docker
- UX/UI: Figma

SOFT SKILLS

- Problem solving
- Teamwork & leadership
- Fast learning & adaptability
- Project management

ABOUT ME

I am a Electronic Cybernetic Engineering Student passionate about technology, backend development, and teaching. I have experience working with Django, Django REST Framework, Spring Boot, and PostgreSQL, building scalable and secure APIs.
I enjoy creating innovative solutions. I also work as a programming instructor at CS50xni, translating and teaching technical content. I'm always eager to learn, collaborate, and take on new challenges in development, security, and artificial intelligence.

WORK EXPERIENCE

February 2024 - present
CS50XNI
Teaching assistant
- Assist students in learning computer science fundamentals and programming concepts.
- Translate and adapt educational materials for Spanish-speaking students.
- Organize and guide coding exercises, debugging sessions, and project reviews.

October 2024 - present
Freelancer
Fullstack developer
- Develop and maintain web applications using Django, Spring Boot, React, and Flutter.
- Design and implement RESTful APIs and microservices architectures.
- Work with databases like PostgreSQL and Firebase for scalable solutions.
- Collaborate with clients to define project requirements and deliver tailored solutions.

ACHIEVEMENTS & AWARDS

3rd Place – Hackathon Nicaragua EntornOS 2024

Developed an innovative gemified platform to learn programming languages

COMMUNITY & LEADERSHIP

Women Techmakers Member

–Active member of the Women Techmakers community, supporting diversity and inclusion in tech.

LANGUAGE
